Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Applicant's RCE dated 12/27/05 has been received in application serial number 10/062,794. All comments have been taken into consideration.

Response to Arguments

2. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-3 and 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Brown et al. 6,981,985. Brown discloses the invention as currently claimed comprising:
A medical device for delivering a biologically active material to a body tissue of a patient

in need of treatment, wherein the medical device comprises a plurality of struts (12) that form a plurality of openings (it is inherent that this is a partial view of a stent and when the entire stent is present that openings are formed); a plurality of non-structural elements (16) integral with and projecting from the struts to the openings; and a coating comprising a biologically active material disposed on the struts and the non-structural elements (see col. 5, lines 21-37 where it is inherent that even if minimally coated the presence of coating is there nevertheless); wherein the shape of the non-structural elements are of a cone, truncated cone, an oval, a straight rod, a bent rod.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Brown et al. in view of Harish et al. 6,506,437. While Brown et al. does state the use of biologically active material, Brown does not specify paclitaxel, dexamethasone, and actinomycin. Harish et al. teaches the use of paclitaxel, dexamethasone, and actinomycin (see col. 6, lines 64 and col. 7, lines 5 and 19). It would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate

Art Unit: 3738

the drugs of Harish et al. into the stent of Brown because they could treat individual dysfunction at the tissue in the vessel site depending upon the individual patients needs

Allowable Subject Matter

7. Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
